

ABDELRAHMAN NASSAR

Full Stack Software Engineer — MERN Stack — SaaS Builder

Cairo, Egypt

✉ abdelrhman.ahmed.nassar@gmail.com  linkedin.com/in/abdelrahmannassar  abdelrahman-nassar.com

Summary

Full Stack Web Developer and Computer Engineering student with hands-on experience building production SaaS platforms, ERP systems, and scalable web applications using MERN stack and Next.js.

Delivered real client solutions serving 20,000+ users across education and business sectors.

Seeking a full-time Full Stack role to create impact and accelerate growth.

Education

Al-Azhar University

July 2023 – July 2028

Bachelor of Electrical Systems and Computer Engineering (ESCE)

Cairo, Egypt

- Computer Engineering Department - Currently in 2nd year
- Academic Excellence: 2nd Place in Engineering Preparatory Year (April 2024)
- Top High School Graduate Award - 99% Score in Al-Azhar Secondary School Certificate

Experience

Learn Shift

Sep 2025 – Present

Founder & Full Stack Developer

Cairo, Egypt

- Built and delivered custom LMS platforms for multiple education businesses serving 20,000+ students.
- Developed scalable monorepo architecture reducing new client deployment time to under one day.
- Led end-to-end product development across frontend, backend, infrastructure, and client delivery.
- Managed developers and coordinated execution using Agile workflows and Trello.
- Digitized traditional education businesses into full online operations.

Shift Up Solutions

June 2025 – September 2025

Full-Stack Developer Intern

Cairo, Egypt

- Contributing to real-world MERN stack projects with focus on scalable web application architecture
- Building optimized React components and RESTful APIs using Express.js and MongoDB
- Collaborating on feature development, debugging, and UI/UX improvements in Agile environment
- Following clean code practices and version control workflows using Git and modern development tools

Kalbonyan Elmarsos

March 2022 – November 2022

Software Engineering Intern

Egypt

- Completed comprehensive full-stack development training program covering modern web technologies
- Built 8+ real-world projects including Omnifood, Bankist, Mpty App, and Forkify App
- Mastered JavaScript fundamentals, React ecosystem, and Node.js backend development
- Won 1st Place in Kalbonyan Elmarsos Programming Competition (March 2023)

Featured Projects

LMS Platform — Learn Shift Core Product | *Next.js, React.js, NestJS, MongoDB, Redis, Docker* Jan 2025 – Present

- Production LMS ecosystem serving 20,000+ students across multiple live deployments — now the core product of the Learn Shift startup (learn-shift.org).
- Built three interconnected apps: a Next.js student portal (Fawry payments, video protection, WhatsApp parent alerts), a React.js admin dashboard (drag-and-drop course builder, bank-based exam engine, real-time analytics), and a 40+ module NestJS REST API (JWT/RBAC, Redis caching, BullMQ queues, Grafana monitoring).
- Restructured into a monorepo with shared packages and Docker + GitHub Actions CI/CD — reducing new client deployment time to under 1 day on Digital Ocean VPS.

Modawim — Productivity SaaS App | *Next.js, TypeScript, PostgreSQL, Drizzle ORM, Redis*

2025 – 2026

- Founded and shipped a full-stack SaaS productivity platform serving thousands of users — offering pre-built tools (Tasks, Goals, Habits, Journaling, Notes, Calendar) with zero learning curve, backed by productivity psychology research.
- Built a reusable SaaS starter template in Phase 1 covering OAuth, 4-role RBAC, Firebase push notifications, payment gateway with coupons, support tickets, blog, newsletter, Playwright E2E tests, PWA, and CI/CD — now forkable for any future product.

Muslim House & Way to Islam — Sessions LMS | *Next.js, NestJS, MongoDB, Docker* **Late 2025 – Early 2026**

- Extended the Learn Shift monorepo to support 1-on-1 live session teaching for two Islamic academies (muslim-house.com, waytoislam.academy) — built and deployed solo.
- Added a full session scheduling and tracking system, subscription management tied to session outcomes, a teacher salary engine (hours + punctuality), automated parent reports, and a bilingual (Arabic RTL + English LTR) UI.

Al-Mostafa Kindergarten ERP System | *Next.js, React.js, NestJS, MongoDB, Redis, Docker* **2026**

- Built a comprehensive ERP system from scratch for a nursery of 100+ employees and 1,000+ children — solo, covering 14 modules: HR and payroll, student academic evaluations, parent portal, classroom management, transportation routing, admissions workflow, billing and installment plans, accounting reports, and multi-channel notifications.
- Designed for 8 distinct user roles (admin, HR, teachers, accountants, receptionists, transport supervisors, parents) with automated PDF generation for reports, invoices, payslips, and bus sheets across all departments.

Al-Azhar Engineering Showcase Platform | *Next.js, TypeScript, Tailwind CSS, Supabase* **Apr – May 2025**

- Built the official project archive platform for Al-Azhar's Computer & Systems Engineering department in year one — hosting 59+ projects and 75+ teams, with search, auto-generated student portfolios, and team profile pages.
- Formally adopted by university leadership (President, Dean, Department Head) as the permanent submission system — and led directly to a paid internship offer from a recruiter at the AZ-SENCS exhibition.

Technical Skills

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Redux, Zustand

Backend: Node.js, Express.js, NestJS, REST APIs, JWT, RBAC

Databases: MongoDB, PostgreSQL, Redis, Supabase, Drizzle ORM

DevOps: Docker, GitHub Actions, VPS, Nginx, Linux

Tools: Git, Postman, Swagger, Cloudinary, Figma, Sentry

Awards & Certifications

AZ-SENCS Engineering Exhibition

May 2025

Participant - Presidential Recognition

Al-Azhar University

- Presented project to University President Prof. Dr. Salama Dawood and Faculty Dean
- Project officially adopted by university and hosted on institutional servers

AWS Certifications

2022 – 2023

Cloud Practitioner & Solutions Architect Associate

Professional Development

2022 – 2024

Multiple Industry Certifications

- NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) - 40 hours
- React - The Complete Guide (incl. Next.js, Redux) - 71 hours
- The Complete JavaScript Course 2022: From Zero to Expert - 69 hours

Achievements

- Built systems used by 20,000+ users
- 70+ GitHub repositories with 100+ stars
- 7,000+ LinkedIn followers
- 200+ Codeforces problems solved

Languages

- Arabic: Native
- English: Professional Working Proficiency (B2/C1)
