

ABDELRAHMAN NASSAR

Full Stack Software Engineer | Cloud & DevOps | SaaS Builder

Cairo, Egypt

✉ abdelrhman.ahmed.nassar@gmail.com  linkedin.com/in/abdelrahmannassar  abdelrahman-nassar.com

Summary

Full Stack Engineer and Computer Engineering student with hands-on experience building and deploying production SaaS platforms, ERP systems, and scalable web applications using MERN stack, Next.js, and cloud infrastructure.

AWS Certified (Cloud Practitioner & Solutions Architect Associate) with practical experience in Docker, CI/CD pipelines, VPS deployment, and Nginx — passionate about cloud-native architecture and currently exploring GenAI integration and LLM-powered product features.

Delivered cross-functional solutions serving 20,000+ users across education and business sectors, collaborating with clients, stakeholders, and multi-role teams including HR, accountants, teachers, and administrators.

Seeking an engineering internship to contribute to impactful, innovative tech and accelerate professional growth within a structured mentorship environment.

Education

Al-Azhar University

July 2023 – July 2028

Bachelor of Electrical Systems and Computer Engineering (ESCE)

Cairo, Egypt

- Computer Engineering Department — Currently in 2nd year
- Academic Excellence: 2nd Place in Engineering Preparatory Year (April 2024)
- Top High School Graduate Award — 99% Score in Al-Azhar Secondary School Certificate

Certifications

AWS Certifications

2022 – 2023

Cloud Practitioner & Solutions Architect Associate

Professional Development

2022 – 2024

Full Stack Engineering Coursework

- NodeJS — The Complete Guide (MVC, REST APIs, GraphQL, Deno) — 40 hours
- React — The Complete Guide (incl. Next.js, Redux) — 71 hours
- The Complete JavaScript Course 2022: From Zero to Expert — 69 hours

Experience

Learn Shift

Sep 2025 – Present

Lead Developer & Software Architect

Cairo, Egypt

- Architected and delivered custom LMS platforms for multiple education businesses, collaborating closely with clients, teachers, and operations teams to translate business requirements into scalable technical solutions.
- Designed a monorepo architecture with shared packages, Docker-based deployment, and GitHub Actions CI/CD — reducing new client onboarding time to under one day on Digital Ocean VPS.
- Led cross-functional execution across frontend, backend, infrastructure, and client delivery using Agile workflows, ensuring on-time delivery across concurrent projects.
- Mentored and coordinated junior developers, conducting code reviews and enforcing clean code standards.

Shift Up Solutions

June 2025 – September 2025

Full-Stack Developer Intern

Cairo, Egypt

- Contributed to real-world MERN stack projects with focus on scalable web application architecture in a professional team environment.
- Built optimized React components and RESTful APIs using Express.js and MongoDB, following clean code practices and Git version control workflows.
- Collaborated across feature development, debugging, and UI/UX improvements within an Agile sprint cycle.

Kalbonyan Elmarsos

March 2022 – November 2022

Software Engineering Intern

Egypt

- Completed an intensive full-stack development training program covering modern web technologies — built 8+ real-world projects including Omnifood, Bankist, Maptty, and Forkify.
- Won 1st Place in Kalbonyan Elmarsos Programming Competition (March 2023).

Featured Projects

LMS Platform — Learn Shift Core Product | *Next.js, NestJS, MongoDB, Redis, Docker, GitHub Actions* **Jan 2025 – Present**

- Production LMS ecosystem serving 20,000+ students across multiple live deployments — the core product of the Learn Shift platform (learn-shift.org).
- Built three interconnected apps: a Next.js student portal (Fawry payments, video protection, WhatsApp alerts), a React.js admin dashboard (drag-and-drop course builder, real-time analytics), and a 40+ module NestJS REST API (JWT/RBAC, Redis caching, BullMQ queues, Grafana monitoring).
- Containerized with Docker and deployed via CI/CD on Digital Ocean VPS with Nginx reverse proxy — engineering decisions rooted in cloud-native scalability and operational reliability.

Modawim — Productivity SaaS Platform | *Next.js, TypeScript, PostgreSQL, Drizzle ORM, Redis* **2025 – 2026**

- Designed, built, and launched a full-stack SaaS productivity platform serving thousands of users — offering integrated tools (Tasks, Goals, Habits, Journaling, Notes, Calendar) backed by productivity psychology research.
- Engineered a reusable SaaS starter template covering OAuth, 4-role RBAC, Firebase push notifications, payment gateway with coupon support, support ticketing, blog, newsletter, Playwright E2E tests, PWA, and CI/CD — now forkable as a foundation for future products.
- Handled the full product lifecycle end-to-end: architecture, backend APIs, frontend UI, infrastructure, and user-facing delivery — demonstrating ownership across all engineering layers.

Al-Mostafa Kindergarten ERP System | *Next.js, NestJS, MongoDB, Redis, Docker* **2026**

- Built an enterprise ERP system for a nursery of 100+ employees and 1,000+ children — covering 14 modules: HR and payroll, student academic evaluations, parent portal, transportation routing, admissions, billing with installment plans, accounting reports, and multi-channel notifications.
- Designed for 8 distinct user roles (admin, HR, teachers, accountants, receptionists, transport supervisors, parents) — collaborated directly with department heads to gather requirements and iterate on workflows, with automated PDF generation across all departments.

Al-Azhar Engineering Showcase Platform | *Next.js, TypeScript, Tailwind CSS, Supabase* **Apr – May 2025**

- Built the official project archive platform for Al-Azhar's Computer & Systems Engineering department — hosting 59+ projects and 75+ teams, with search, auto-generated student portfolios, and team profile pages.
- Formally adopted by university leadership (President, Dean, Department Head) as the permanent submission system — presented at the AZ-SENCS exhibition and led directly to a professional internship offer from a recruiter on-site.

Technical Skills

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Redux, Zustand

Backend: Node.js, Express.js, NestJS, REST APIs, JWT, RBAC

Databases: MongoDB, PostgreSQL, Redis, Supabase, Drizzle ORM

Cloud & DevOps: AWS (Certified), Docker, GitHub Actions CI/CD, VPS, Nginx, Linux

Exploring: GenAI integration, LLM APIs, prompt engineering

Tools: Git, Postman, Swagger, Cloudinary, Figma, Sentry, Grafana

Awards & Recognition

AZ-SENCS Engineering Exhibition

May 2025

Participant — Presidential Recognition

Al-Azhar University

- Presented project to University President Prof. Dr. Salama Dawood and Faculty Dean
- Project officially adopted by university and hosted on institutional servers

Kalbonyan Elmarsos Programming Competition

March 2023

1st Place

Achievements

- Built systems used by 20,000+ users across production deployments
- 70+ GitHub repositories — 100+ stars
- 7,000+ LinkedIn followers
- 200+ Codeforces problems solved

Languages

- Arabic: Native
- English: Professional Working Proficiency (B2/C1)
