

ABDELRAHMAN NASSAR

Software Engineer Student — Full-Stack Developer — Competitive Programmer

Cairo, Egypt

✉ abdelrhman.ahmed.nassar@gmail.com  linkedin.com/in/abdelrahman-ahmed-nassar  abdelrahman-nassar.netlify.app

Summary

Full-stack web developer passionate about **software engineering**, **problem solving**, and building scalable Web Applications.

Delivered **7+ production-grade web applications** using modern technologies including Next.js, TypeScript, NodeJs, NestJS, and MongoDB.

Skilled in designing secure, performant, and maintainable software with strong understanding of both frontend and backend architectures.

Education

Al-Azhar University

July 2023 – July 2028

Bachelor of Electrical Systems and Computer Engineering (ESCE)

Cairo, Egypt

- Computer Engineering Department - Currently in 2nd year
- Academic Excellence: 2nd Place in Engineering Preparatory Year (April 2024)
- Top High School Graduate Award - 99% Score in Al-Azhar Secondary School Certificate

Experience

Brand Shift

June 2025 – Present

Full-Stack Developer Intern

Cairo, Egypt

- Contributing to real-world MERN stack projects with focus on scalable web application architecture
- Building optimized React components and RESTful APIs using Express.js and MongoDB
- Collaborating on feature development, debugging, and UI/UX improvements in Agile environment
- Following clean code practices and version control workflows using Git and modern development tools

Mostaqi (Freelance Platform)

August 2024 – May 2025

Freelance Full-Stack Developer

Cairo, Egypt

- Delivered end-to-end full-stack applications using Next.js, TypeScript, Tailwind CSS, and Supabase
- Built educational course platform enabling teachers to upload courses, manage students, and track sales
- Developed university project showcase portal officially adopted by Al-Azhar Engineering Department
- Implemented complex admin dashboards with CRUD operations, authentication, and real-time data management

Kalbonyan Elmarsos

March 2022 – November 2022

Software Engineering Intern

Egypt

- Completed comprehensive full-stack development training program covering modern web technologies
- Built 8+ real-world projects including Omnifood, Bankist, Mapty App, and Forkify App
- Mastered JavaScript fundamentals, React ecosystem, and Node.js backend development
- Won 1st Place in Kalbonyan Elmarsos Programming Competition (March 2023)

Featured Projects

Learning Management System | *Next.js, React.js, TypeScript, NestJS, MongoDB, Redis, Docker*

Jan – Apr 2025

- **Overview:** Designed and developed a full-scale LMS ecosystem serving over 20K students and 5+ instructors — composed of three interconnected applications: a student learning portal, an administrative dashboard, and a backend API.
- **Student Website (Next.js):** Built a performant and accessible learning interface with secure authentication, course browsing, interactive exams, progress tracking, and parent notification systems. Optimized using ISR and API caching for seamless experience.
- **Admin Dashboard (React.js):** Developed a modular, data-driven control panel for teachers and admins — enabling real-time analytics, drag-and-drop course creation, student management, and automated grading tools.
- **Backend (NestJS + MongoDB):** Engineered a robust, scalable REST API with modular architecture, DTO validation, and optimized aggregation pipelines. Integrated **Redis** caching for high-performance data access and implemented Dockerized microservices with CI/CD pipelines for automated deployment.
- **Result:** Delivered a responsive, production-ready LMS powering tens of thousands of learners with a secure, efficient, and maintainable codebase.

- Founded **LearnShift**, a startup specialized in e-learning solutions, and built its official landing page to showcase the vision, features, and unique value proposition.
- Gained hands-on experience in **product and project management**, including writing software and product documentation, defining MVP scope, and coordinating a small team.
- Conducted market surveys, business analysis, and customer research to align technical development with real educational needs and market gaps.
- Oversaw marketing and customer support workflows, managing costs efficiently and ensuring brand consistency across design and messaging.
- Enhanced ability to think beyond code — focusing on the **product’s value, user experience, and long-term sustainability**.

- Architected and launched the official exhibition platform for Computer & Systems Engineering projects, enabling 1,000+ students to publish, manage, and present their work.
- Formally adopted by university leadership — including the Dean and University President — as the department’s official showcase website.
- Featured at the AZ-SENCS Engineering Exhibition with presidential recognition and institutional endorsement.
- Implemented scalable search, team collaboration, and portfolio systems integrated with Supabase storage and authentication.

Across all projects, empowered 20K+ learners and 1K+ engineering students with scalable, production-grade web applications — while bridging software engineering with real-world product design and entrepreneurship.

Relevant Coursework & Skills

- | | | |
|-----------------------|------------------------|---------------------|
| • Web Development | • Database Management | • Operating Systems |
| • Data Structures | • Software Engineering | • Problem Solving |
| • Algorithms Analysis | • Computer Networks | • System Analysis |

Awards & Certifications

AZ-SENCS Engineering Exhibition

May 2025*Participant - Presidential Recognition**Al-Azhar University*

- Presented project to University President Prof. Dr. Salama Dawood and Faculty Dean
- Project officially adopted by university and hosted on institutional servers

AWS Certifications

2022 – 2023*Cloud Practitioner & Solutions Architect Associate*

Professional Development

2022 – 2024*Multiple Industry Certifications*

- The Complete Node.js Developer Course (3rd Edition) - 35 hours
- React - The Complete Guide (incl Hooks, React Router, Redux) - 48 hours
- The Complete JavaScript Course 2022: From Zero to Expert - 69 hours
